

About Us

Buxton Roofing, LLC, is a locally owned and operated company providing professional roofing services to commercial, industrial and residential customers across Northeast Ohio for over 30 years. We have the experience and expertise necessary to help you develop a roofing program to meet your budget and needs.

Commercial Roofing Systems

A critical factor to a successful roofing project is using a contractor who is both familiar and capable of installing several types of roof systems. No roof system is right for all situations. It is vital to install the correct roof system which is designed to meet your needs. Buxton Roofing is thoroughly experienced and approved to install and warrant all major roofing systems. We install

only proven roof systems, backed by major manufacturers that offer strong warranties covering both materials and labor for up to 30 years. Our crews are professionally certified and trained to install products such as:

- E.P.D.M. Rubber
- T.P.O.
- P.V.C.
- Modified Bitumen

Asphalt Shingles

Buxton Roofing is proud to have achieved the status of a CertainTeed Select Shingle installer. At this premier level of CertainTeed's accreditation, we are able to offer a 20 to 50 year material and labor warranty on algae resistant asphalt shingles. Buxton Roofing was the top installer in Ohio of CertainTeed warranted roof projects for 2008.

Repair and Maintenance Division

Roof repairs and maintenance are critical in order to prolong the life of a roof. Buxton Roofing employs a team of specially trained repair and maintenance technicians. This special team is dedicated to respond to all leak calls within 24 hours, seven days a week.

Maintenance Programs

Regularly scheduled maintenance is extremely cost efficient and beneficial in extending the roof's service life. The leading cause of roof failure is neglect. Our maintenance program enables us to find the problem areas BEFORE they occur. A Roofing Maintenance Program with Buxton Roofing will provide a thorough analysis of your existing roof. The plan includes items such as:

- Bi-annual scheduled inspections
- Clearing of debris from roof and drains
- Detailed description with pictures of your current roofs condition
- Completing minor roof repairs

Our reputation of quality and reliability continues to spread throughout Northeast Ohio. We strive to be your number one roofing contractor. Whether it's an emergency leak repair to a Preventative Maintenance Program or a total roof replacement, Buxton Roofing can help with all your roofing needs.
